

# Office of Career & Personal Development

## 4-YEAR PLAN

### Freshman Year

Become acquainted with the Office of Career and Personal Development in your first year when staff from the office visits your GCS 1100, Greensboro College Seminar class to introduce you to the office and all the services available to students. Now is a good time to also schedule a one-on-one career counseling session.

### Sophomore Year

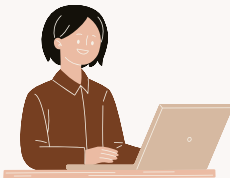

Whether you are clear about your major and career goals or completely undecided, CLD 2100, Define Your Path, taken in your sophomore year, will help you understand how your unique interests, personality, skills, and values relate to majors and careers. You will also begin writing your college resume.

### Junior Year

Every student who graduates from Greensboro College will engage in an experiential learning experience. Many will do an internship in their junior year in which valuable networking contacts and work place skills will be acquired.

Enroll in CLD 3100, Experiencing Career and Life Directions, to perfect your resume and cover letter, build a LinkedIn profile and learn about effective interviewing and job search strategies.

### Senior Year

Senior capstone courses in each major will further prepare students for their careers and graduate or professional school.

Schedule an appointment with the Director of Career and Personal Development to practice your interview skills in an in person or virtual mock interview.
